## FOR FREEDOM AND THE RIGHT

## "THE ALLIES"

There is the title of a most interesting War Album issued by The Oyen Herald and Weekly Star.

It is bristling with useful information from cover to cover. The front cover is a most beautiful design on which the flag of all the Allies is a clear artistic effect. The Album contains the flags in colors of all the Allies. It tells the full story of the "Glorious Jack" and "Old Glory" and gives the date and reason for entry of all the Allies into the War. It gives the system of Government of each of the Allies, etc., etc. It contains the Nations Songs of Great Britain, France and the United States as well as a great many of the popular songs, such as "Tipperary," "Long Live the King," "Good Bye, Broadway," "I'm a Soldier," etc., etc. It contains a full list of the war since its commencement up to time of going to press. It blank space on which the reader may fill in future dates and how he complete history. The Album is a most useful book on sight at any reasonable price, but is not for sale. It is absolutely free to all who subscribe to The Family Herald and Weekly Star for 1918. The yearly subscription price is \$1.25. We have made a splendid combination with the Family Herald and can offer that, together with the Album and The Oyen Herald for \$1.25. The offer of the Album is for a limited time only. Order now and be sure of a copy. The Family Herald does not continue such an offer indefinitely. A sample of the Album may be seen at this office.

If it is your last dollar, have your teeth cared for. Your health depends upon good teeth. See Dr. Taylor, Alask.

## "Worlds in the Making."

Dr. Arthur D. Carpenter, astronomer, whom the late Percival Lowell, of Flagstaff Observatory, characterized as "perhaps the greatest living popularizer of astronomy," is coming to the Oyen Chautauqua Festival.

Taking for his subject, "The Greater Universe and Worlds in the Making," Dr. Carpenter brings to the masses of the people a wealth of scientific truth couched in language understandable to all, from the youngest to the oldest in his audiences. While dealing with a mighty subject, Dr. Carpenter is intensely human, interesting frequent humorous illustrations that will aid in driving home important scientific facts.

As further aid to presenting a compact picture of descriptive astronomy that will be permanently stamped upon the minds of his hearers, Dr. Carpenter carries with him his famous Matlick Tellurium machine. It is a revolving miniature of the universe, showing a motion the relative positions of our earth, moon and sun as the vital base of the Greater Universe which Dr. Carpenter describes. It is an interesting experience to hear Dr. Carpenter unfold the startling facts and laws of the stellar universe. As a speaker he is of the engaging simplicity that is the complement of truly great minds.

It seems strange that in our public and private schools today the is taught of astronomy. Three thousand years ago the shepherds of Chaldea, while watching their flocks under their cloudless skies, had obtained a far better knowledge of the starry heaven than the average college man of modern times. Yet no branch is more abounding in interest.

To present the marvels of the universe in terms of the popular and has been the life-work of Dr. A. D. Carpenter, eminent scientist and astronomer. There is not a dry minute in his lecture, "Worlds in the Making."

## The Duty That Rests Upon All Canada in Regard to the Victory Loan, 1918.

Great Britain having borne a tremendous burden of war for our years, cannot be expected to finance her war purchases in this country. The United States is perfecting a vast war machine. Her financial resources are required for that purpose and to place credit, the disposal of the Allies. It is necessary, therefore, that Canada should raise the funds required, not only to carry on our normal and war activities, but also to advance sums to Great Britain for her purchases here.

While in the United States the people have been asked to subscribe a Liberty Loan every few months, we, in Canada, have not been asked to subscribe a war loan since November, 1917, and will not be called upon to do so until October, 1918. This is an enormous advantage in every way. The long respite from War Loan activities has enabled the 1917 Victory Loan to be splendidly absorbed and distributed, has in addition created a healthy market for provincial and municipal bonds, and has allowed business generally to proceed without the temporary halt which war loan issues always bring. Furthermore, it is not too much to say that the maintenance of the market price of the 1917 Victory Loan at the issue price and the recent advance in the issue price constitute a record in war finance.

If satisfactory results are achieved with Canada's 1918 Victory Loan, the funds raised will supply our needs for another year. This is an additional reason why every effort should be made to make the Loan an unqualified success.
